Professional Summary

Quality Assurance Engineer with 3+ years of experience in manual and automation testing of web-based applications. Skilled in test case design, functional testing, regression testing, API testing, defect tracking, and QA process improvement. Hands-on experience with Selenium, Playwright, Postman, JMeter, Java, Python, JIRA, Jenkins, Docker, and Agile/Scrum delivery environments.

Professional Experience

Assistant Software Engineer (QA & Tester)

Unicode Systems Pvt. Ltd. | Lucknow, India

Promotion progression: Software Trainee → Associate Consultant → Assistant Software Engineer → Software Engineer

May 2023 - Present

- Created and executed test cases, test scenarios and automation scripts (Selenium, Playwright) for healthcare, ERP, HR applications to reduce manual testing effort.
- Performed manual, regression, and end-to-end testing to ensure stable feature releases.
- Conducted API testing with Postman and supported validation of business workflows, integrations, and data accuracy.
- Participated in Agile/Scrum ceremonies to align QA activities with sprint goals and release timelines.
- Collaborated with cross-functional teams to improve test coverage, product quality, and release readiness.

Projects

Hospital Information Management System (HIMS)

- Tested multiple hospital management modules including OPD, IPD, ICU, OT, Emergency, Billing, Lab, Pharmacy, Inventory, Admin, HR, CSSD, Maternity, IVF and ABHA.
- Executed manual and automation testing to validate workflows, identify defects, and support smooth integration between modules.

- Designed test cases, performed API validation using Postman, and tracked defects in JIRA.

Enterprise Resource Planning (ERP)

- Validated Inventory, Sales, POS, and HR modules to ensure accurate business process execution.
- Tested workflows including Vendor Creation, Purchase Orders, IRN, GRN, Return PO, Return GRN, and Gate Pass processes such as NRGp, RGP, and Scrap.
- Verified report generation, business rules, and data accuracy across key ERP modules.

Human Resource Management System (HRMS)

- Tested Employee Onboarding, Attendance, Shift Roster, Holiday Settings, and Leave Management modules.
- Validated workflow accuracy, role behavior, and business rules to support reliable HR operations.

Resource Time Management System (RTMS)

- Tested Employee Onboarding, Daily Work Log, and Punch In/Punch Out functionality for attendance and work-hour tracking.
- Validated attendance management, work regularization, and role-based permissions for Employee, HR, Manager, and Admin users.

Candidate Evaluation System (CES)

- Worked on Question Creation, Test Scheduling, Automated Evaluation, and Result Generation workflows.
- Validated role-based access for Admin, Candidate, and Evaluator users.
- Designed test cases, performed API testing with Postman, and tracked defects using JIRA.

Technical Skills

Testing: Manual Testing, Automation Testing, Functional Testing, Non-Functional Testing, Regression Testing, Bug Tracking & Reporting, Test Case Development, SDLC, STLC

Automation & Frameworks: Selenium with Java, Selenium with Python, Playwright, Cucumber, TestNG, Apache POI

API & Performance Tools: Postman, JMeter, Burp Suite

Dev Tools: JIRA, Orangesrum, Leantime, Git, Jenkins, Docker

Programming: Java, Python, PHP, C, C++

Methodologies: Agile, Scrum
